PROFESSIONAL SUMMARY

Data Analyst completing an MSc in Data Science and Analytics at Brunel University of London (A+ in Quantitative Data Analysis and Data Visualisation), with current industry experience as a Junior Data Engineer. Builds automated data pipelines in SQL and Python and Power BI dashboards that turn raw data into business decisions. Brings domain experience in regulated NHS healthcare operations and hands-on leadership of an 18-person team.

EDUCATION

MSc in Data Science and Analytics, Distinction (Expected) | **Brunel University of London** | 2025 – 2027

Module grades: Quantitative Data Analysis (A+); Data Visualisation (A+); Critical Analysis of Modern Data (A); Distributed Data Analysis (A); Digital Innovation and Strategy (A-); Research Project Management (A-).

Key study areas: machine learning, distributed data systems, data ethics and governance, analytics strategy and research methods.

BSc (Hons) in Computer Science, Upper Second Class (2:1) | **Brunel University London** | 2021 – 2023

Key modules: Software Engineering, Software Project Management, Data and Information, Artificial Intelligence, Algorithms, Cybersecurity, Networks and Operating Systems.

KEY PORTFOLIO PROJECTS

Retail ELT Pipeline & Customer KPI Dashboard | Python, SQL, dbt, DuckDB, GitHub Actions, Power BI

- **Problem:** 541K raw transactions from a UK online retailer held 5,268 duplicates, 133,846 lines with no customer ID and 9,251 cancellations, so revenue and retention could not be reported reliably.
- **Solution:** Built an ELT pipeline loading raw data into DuckDB and modelling it in dbt into a star schema, with 42 data quality tests run automatically by GitHub Actions on every change.
- **Impact:** Delivered a Power BI dashboard of revenue, cohort retention and RFM segments for 4,334 customers, showing the top 20% drive 74.6% of £8.7M revenue.

Healthcare Operations Analytics: NHS Pharmacy Demand & Workflow | Python (pandas, SimPy), SQL API, Tableau

- **Problem:** London pharmacy numbers stayed flat (1,714 to 1,716) while Pharmacy First consultations rose 20.5% year on year, stretching pharmacist time.
- **Solution:** Pulled 19 months of NHSBSA dispensing data through its SQL API into a Tableau dashboard, and mapped current and redesigned workflows as swimlane process maps with 12 MoSCoW-prioritised user stories.
- **Impact:** Built a discrete-event simulation (4,500 simulated days) showing pre-assembled repeats plus an accuracy checking technician cut a busy pharmacy's 95th-percentile wait from 48 to 20 minutes, presented in a business case.

E-commerce Checkout Funnel Analysis & Product Requirements Document | BigQuery SQL, Python (statsmodels), Looker Studio

- **Problem:** Only 1.35% of 360K Google Merchandise Store sessions ended in a purchase; the product question was where buyers drop out and what to fix first.
- **Solution:** Rebuilt sessions from nested GA4 events in BigQuery SQL and found new visitors complete checkout 30% of the time against 60% for returning visitors, on every device.
- **Impact:** Wrote a PRD and RICE-scored roadmap sizing a $61K (+17%) quarterly opportunity, and designed a 30-day guest-checkout A/B test using power analysis.

NHS GP Appointment Demand Forecasting | Python (pandas, statsmodels, Prophet), Streamlit

- **Problem:** GP appointment demand swings by over 30% across the year, peaking every October, making staff rotas hard to plan weeks ahead.
- **Solution:** Built daily series from 10M rows of NHS England data and back-tested four models (seasonal naive, growth-adjusted, SARIMA, Prophet) across 8 series and 4 rolling origins.
- **Impact:** The selected model reached 1.6% monthly error, 61% better than the baseline, forecasting 206M appointments for Sep 2026 to Feb 2027 in an interactive Streamlit app.

PROFESSIONAL EXPERIENCE

Junior Data Engineer (Industrial Placement) | **Carrot Soft Ltd** | Sep 2026 – Present | London, UK (Remote)

- Analyse 63K+ marketing and business records using Python, SQL, R and Power BI to uncover trends and support commercial decision-making across client portfolios.
- Built automated ETL workflows and interactive dashboards that cut reporting time by 35% and improved data accuracy by 25%.
- Translate business questions from non-technical stakeholders into clear KPIs, data stories and practical recommendations.

Educational Technology Analyst | **Brunel University London** | Jun 2022 – Oct 2023 | London, UK

- Supported the migration of 5,000+ users to a new learning management platform with zero data loss.
- Resolved 300+ student and staff support tickets, improving response times and digital service reliability.
- Trained 50+ academic staff and wrote accessibility-aware guides that drove platform adoption.
- Tracked engagement in Excel and learning analytics tools, identifying adoption patterns that lifted platform use by 15%.

SKILLS

Data Analysis & BI: SQL (joins, CTEs, window functions), Power BI (DAX, Power Query), Tableau, Looker Studio, Excel, data cleaning, KPI design, data modelling (star schema), data storytelling.

Statistics & Machine Learning: Python (pandas, scikit-learn, statsmodels, Prophet), R, hypothesis testing, regression, A/B testing and power analysis, time-series forecasting, discrete-event simulation (SimPy).

Data Engineering: ETL/ELT pipelines, dbt, DuckDB, Google BigQuery, data quality testing, Git/GitHub, GitHub Actions (CI/CD).

Business & Delivery: requirements gathering, user stories, swimlane process mapping, PRDs, RICE and MoSCoW prioritisation, business cases, Agile/Scrum, stakeholder management, UK GDPR.

Web & Platforms: JavaScript, React, HTML, CSS, Node.js, Streamlit, Java, Microsoft 365, SharePoint, Power Platform.

Certification: Data Analyst Bootcamp 2025: Python, SQL, Excel & Power BI.

HEALTHCARE EXPERIENCE

Boots UK | Dec 2023 – Present | London, UK

Roles: Pharmacy Dispenser, London (Oct 2026 – Present); Healthcare Specialist, Pinner (May 2025 – May 2026); Customer Advisor, Uxbridge (Dec 2023 – Dec 2024).

- Dispense and label NHS prescriptions accurately under pharmacist supervision, using the patient medication record system and the Electronic Prescription Service.
- Advised customers daily on over-the-counter medicines under NHS compliance and confidentiality rules, escalating clinical queries to the pharmacist.
- Ran delivery intake and stock-accuracy audits, and acted as on-site technical lead for the CEWE photo station, fixing hardware, software and network faults.

LEADERSHIP & ENTREPRENEURSHIP

Activity Manager (previously Activity Leader & Workshop Facilitator) | **ANGLO Green Light for English** | Summers 2025 & 2026

- Managed a team of 18 activity staff, building shift rotas, approving timesheets and delegating tasks to keep every session fully staffed.
- Designed and facilitated workshops for international students, adapting content to mixed ages and English levels.
- Coordinated logistics for events and activities, including scheduling, staffing and contingency plans.

Co-Founder | **Hypespark** | 2026 – Present

- Co-founded an early-stage software venture; set up the GitHub organisation, repositories and version-control workflow for its first product, BetterShelf.
- Share ownership of product direction, technical decisions and early go-to-market planning with the founding team.

ADDITIONAL INFORMATION

Chess: Play rapid chess regularly online, rated around 1500 and working towards 2000.

Sport: Badminton, football and swimming; go-karting.
